

Introducing EBSCOhost 2.0!

Presented by Nancy Grimaldi, EBSCO Information Services

Join us for a preview of EBSCO Publishing's next generation of its popular EBSCOhost user interface: EBSCOhost 2.0. Based upon results gathered from extensive user testing, EBSCOhost 2.0 offers a clean new look and feel, for a technologically sophisticated, yet familiar search experience, with the built-in flexibility to provide individual user customization options.

New and improved features include:

- ◆ A Result List loaded with user-customization features
- ◆ EBSCO's Visual Search option provides users with a graphically rich alternative to the Basic or Advanced Search screens
- ◆ The recently introduced *Image Quick View* Result List enhancement
- ◆ Improved bibliographic record functionality makes citing articles easier than ever

Come see and try out these features and more in this hands-on workshop.

School librarians/media specialists please note: you'll be able to attend a special school-oriented session on June 25. Look for the "EBSCO Boot Camp" flyer in this packet and at <http://www.hrlc.org/ mailing.htm>

DATE: Wednesday, June 11, 2008
